

# REV CLINICS LAUNCHES OMURA PLATFORM WITH SIX STRAINS

**CAMBRIDGE, October 27, 2020** – [Revolutionary Clinics](#), one of the state's leading providers of medical marijuana, announced that [Omura](#), a heat-not-burn technology platform that uses pre-filled Flowersticks, are now available at all three dispensary locations in Somerville and Cambridge as well as select adult-use retailers.

"The Omura platform is the latest way we provide our patients with a high-quality cannabis experience," said Revolutionary Clinics CEO Keith Cooper. "There is great demand for discreet consumption methods, and the limited vapor and odor is bound to appeal to a wide audience. We look forward to continuing to expand our offerings on the Omura platform."

Omura is a first of its kind, heat-not-burn device allowing for a controlled whole flower experience method. This technology uses convection heat to create minimal vapor and minimal lingering odor. The available pre-filled Flowersticks will include six strains: Citrique, Bruce Banner, Lemon Meringue, Bootylicious, Mr. Clean and Meltdown.
